Dear Sir/Madam

We refer to the above mentioned application and would like to object the building of a new floor on top of our existing building.

I would like to express my family's concerns about the application to build another whole floor, especially this being a very new building.

1. With the pandemic, we have been and will be working from home almost full time, the construction of a whole new floor will not only impact our professional but recreational lifestyles significantly, especially as we are located on the top floor.
2. We are also concerned about safety – not only during construction but should the top floor be built- it's implications. Building an entire floor above the current building seems very adhoc and we do recognise the potential risk it has on the structural integrity of the current building. Building another floor of apartments also introduces the risk of over – crowding, we have concerns with fire safety as we will all be sharing the same exits.

Finally We have enjoyed the quiet and the bright surrounding of our flat, we hope you could help us to maintain this way.

Thank you

Yours sincerely

JJ Ong and family
