Subject: Application 2020/5913/P

[REDACTED]

This proposal borders on the insane. The little streets around the site are already frequently clogged with traffic, and many of the roads have steep corners difficult for HGVs. It's bad enough for Veolia's refuse trucks but entirely unsuitable for regular increased access as proposed, quite apart from additional pollution and noise. It should be remembered that a large proportion of the surrounding area is residential and that additional night time heavy traffic is unacceptable..

PLEASE reject the application

Thank you

Yours sincerely
