Unfortunately, as I have frequently experienced the Planning Application website does not agree with my computers and steadfastly refuse to let me leave my comments, even after Cache clearance, especially in this case.

My comment on Application **2021/3607/P (Willow Road 49)**.

**“ This is an important application with a great positive impact on the community utilising and improving an important long standing derelict asset (old pottery).
The applicants have taken great care to propose a sympathetic development with great community value for children and adults.
the applicant's careful planning is also witnessed by employing a Disability Consultant who took great care to improve the current difficult access to the property.
I support this application in the strongest possible terms.”**

Yours faithfully,
Stephan Strobel
