Subject: Intended Works at 14 Greenaway Gardens NW3

Dear Sir/Madam

We live at 12 Greenaway Gardens and have received a letter of notification of intended works to trees in a conservation area.

We have tried to access the application online, but the service is unavailable.

As owners and occupiers of No.12, we are concerned by the nature of the works being proposed to the trees in the garden, part of which backs onto and overlooks our garden.

By way of background, there is a part of the garden of No.14 which overlooks our garden as the height of the ground of that part of 14 is much higher than our garden.

If any trees in that part of the garden, which affect us, are felled to ground level, we will not only lose the beauty of the greenery of our area, but just as importantly, we will lose the privacy the trees afford us between the two gardens. This is especially pertinent in this situation, as the ground of number 14 is much higher than ours and overlooks our garden. The occupiers of house 14 will therefore be able to easily look into our garden, and similarly, we will be able to see them standing in their garden.

We will be happy to submit photographic evidence or provide access to you.

Jane Howard-Yam
