

## Technical Data Sheet.

### SSSLP Fully Grown Sedum Slimline Pack.

## Description.

Fully Grown Slimline Sedum Roof Pack includes: 12mm roof drainage system, 25mm pre-blended lightweight engineered growing medium and fully grown sedum carpet roll.

The slimline pack is ideal in situations requiring a lower overall saturated roof weight. In addition, it will reduce the overall height of the green roof.

### **Saturated Roof Weight**

Minimum roof fall 1: 120 - 47.35kg m2

### **Benefits For the Building Owner:**

Expand roof life 2-3 times ( up to 60 years )  
 Reduce air-conditioning costs  
 Reduce winter heating costs  
 Storm water management tool  
 Up to 15 LEED credits  
 Government and municipality incentives  
 Improve public relations  
 Transform dead space into garden space

### **Benefits For the community:**

Reduce storm water runoff  
 Reduce city 'heat island' effect  
 Reduce smog and improve air quality  
 Reduce noise  
 Reduce energy demand  
 Improve aesthetics Provide green space

### **Benefits For the Environment:**

Prevent combined sewer overflow  
 Reduce carbon monoxide impact  
 Remove nitrogen pollution from rain  
 Neutralize acid rain effect  
 Provide habitat for wildlife
