2021/3621/P	Tom Walter	02/11/2021 23:18:07	OBJ	<p>please can you replace my original objection with the one below:</p> <p>I strongly object on the grounds that the site is in a conservation area and in the case of St. Mary's Church although the masts will be partially hidden inside the tower behind a Perspex screen there will be a cable running down the side of the tower which will be visible. Under planning laws no alterations and adaptations to be made to St. Mary's Church; this is because it is a Grade 2 listed building.</p> <p>This mast is almost opposite us, and there are well documented and recent cases of people suffering severe health issues due to the type and strength of waves given out by these 5G masts.</p> <p>a recent case as below:</p> <p>one of the long serving receptionists at the Tufnell Park Osteopaths Practice has actually been forced out of her home in the Archway area in a block of flats due to a network of 5G masts being placed on the roof. Apart from a constant humming noise she has been feeling nauseous and sick and constant migraine of course. This is totally outrageous. Even an environmental officer from Camden who visited her flat stated that there was a major problem here and yet the council did nothing to remove the masts. Is this the kind of future we can expect despite Camden's policy to increase better health and wellbeing in a current survey. There is something totally morally wrong here and does not make any sense whatsoever that we may all be exposed to even more dangerous RFRs, EMF resulting in microwave sickness and frequent migraine attacks.</p> <p>there are crucial and validated cases of people I personally know who's lives have become ruined and intolerable due to these health destructive waves.</p> <p>Tom Walter.</p>
