2021/4722/P	Caroline Hill for Kentish Town Road Action	12/10/2021 21:23:14	COMMNT	<p>Kentish Town Road Action objects to this application because, although the pole mounted antennas would be removed, the retained existing rooftop equipment cabinets are virtually the same height and are detrimental to the appearance of the immediate area. They add about two metres to the height of this five storey building and are disproportionate in height. They are visible and intrusive from the north of Kentish Town Road, and especially from the south of Fortress Road. They are visible and intrusive from properties on the other side of Kentish Town Road and Leverton Street, both of which are in the Kentish Town Conservation Area.</p> <p>These ugly objects obstruct the skyline and we want them removed. They were erected without planning permission and for years the applicants have been trying to obstruct the due planning process to remove them.</p>
