2021/5170/T	Matthew Paine	23/10/2021 10:20:26	OBJ	This cherry tree is not large, and it seems highly unlikely that it is causing the garden wall to lean nor the paving stones to move - neither of which appear to be immediately adjacent to the tree, suggesting the movements have a different cause or predate the cherry. The request to fell the cherry appears to be speculative and unnecessary, and a loss to the street environment for no good reason.
2021/5170/T	B A Abraham for The Belsize Society	31/10/2021 16:45:54	OBJ	On behalf of the Belsize Society: Both trees are visible from the street (Fellows Road) and therefore have amenity value. The false acacia (T2), in particular, is a mature attractive tree which makes a significant contribution to the streetscape - it is assumed that this is the tree subject to a TPO. It appears that the brick wall will need to be rebuilt anyway so it should be reconstructed in a manner that accommodates the trees. Trees are very important to the character of this conservation area and so should be given priority and retained when work is carried out to boundary walls.
