2021/3105/P	Anne and John Bird	04/11/2021 12:10:59	OBJ	<p>My husband and I would like to strongly object to the construction of an Eruv by means of over a dozen 15m poles and wires attaching the tops of said poles on public, non denominational land in Camden and some poles in Haringey.</p> <p>The grounds for objection are threefold</p> <p>Firstly we object to public land being subsumed for so called [REDACTED] in what we view a secular state. Could I for instance get permission for a 15 m transparent crucifix in my front garden? I doubt it and for good reason. Please note there are no Eruvs in France.</p> <p>Secondly we view the erection of any poles, of whatever height, and attached wires, however transparent, on public land for the purpose stated as unnecessary clutter and an eyesore.</p> <p>Thirdly we are concerned about the effect on wildlife in general and, in particular, on bats. Eruvs could be detrimental to them in their nocturnal flights.</p> <p>Finally we would like to add that should we want our children to go to a particular school we would move close to that school for that purpose. Should we require regular medical attention in a hospital setting then we would make efforts to live close to a hospital. Should we be Jewish and wish to ignore the strictures on the sabbath which are afforded by living within an Eruv, then, you have guessed it, we would move to a house inside an existing Eruv (of which there are plenty both in Camden, Barnet and beyond.)</p> <p>Should this application be approved there will be no stopping the proliferation of Eruvs throughout the borough.</p>
