2021/4063/P	Catherine Hetherington	03/11/2021 14:51:17	OBJ	I am concerned that my garden and my flat will receive significantly less light with the rear extension proposed. It will reduce my enjoyment of my property and I believe devalue my property compared to when I purchased it. This additional space allows the developer to extract more value from the site, but at the cost of local residents who will lose value and light which I think is significant and unfair. On those grounds I don't think the extension application should be granted.
