

# Video of the 23 Ravenshaw Street crossover during exceptionally heavy rainfall

London experienced exceptionally heavy rainfall on Monday 12 July 2021. This video shows the crossover of 23 Ravenshaw Street at 16.35 on that day. It shows how water takes advantage of the dropped curb to flow onto the pavement and down the hill in front of No's. 25, 29 and 29 etc. Since the appeal site slopes gently towards the street, rainwater currently also flows off the site and onto pavement. *(Clickable links not permitted by PINS)*
