Dear Sir/Madam

DECISION

Town and Country Planning Act 1990 (as amended)

Householder Application Granted

Address:
17 Murray Mews
London
NW1 9RH

Proposal:
Erection of a roof extension and associated works to dwelling house (Class C3).

Drawing Nos: (134/P-)01, 02, 03, 17 rev A, 18 rev A; (278/P-)26, 31 rev A, 32 rev A, 33, 34, 41 rev A; (10332-)1 rev C, 2 rev C; Design and access statement from 800 Group dated 13/05/2021.

The Council has considered your application and decided to grant permission subject to the following condition(s):

Condition(s) and Reason(s):

- 1 The development hereby permitted must be begun not later than the end of three years from the date of this permission.

Reason: In order to comply with the provisions of Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 All new external work shall be carried out in materials that resemble, as closely as possible, in colour and texture those of the existing building, unless

otherwise specified in the approved application.

Reason: To safeguard the appearance of the premises and the character of the immediate area in accordance with the requirements of policy D1 and D2 of the London Borough of Camden Local Plan 2017.

- 3 The development hereby permitted shall be carried out in accordance with the following approved plans: (134/P-)01, 02, 03, 17 rev A, 18 rev A; (278/P-)26, 31 rev A, 32 rev A, 33, 34, 41 rev A; (10332-)1 rev C, 2 rev C; Design and access statement from 800 Group dated 13/05/2021.

Reason:

For the avoidance of doubt and in the interest of proper planning.

Informative(s):

- 1 Reasons for granting planning permission:

This planning application proposes predominantly similar works to those approved, but yet to be implemented, under a previous application (2020/5945/P) dated 25/03/2021. The current proposal differs from the approved scheme through the exclusion from the proposals of the louvre facing material and instead proposes the use of pre-rusted Corten cladding panels.

All alterations are considered to be relatively modest and involve no significant change to the approved scheme. As with the previous approval, the proposed extension would abut the existing glazed slope and would be rectangular in shape, measuring approximately 3.3m wide and 4.8m deep, ensuring that 3.2m of flat roof space would remain in front of the proposal. The extension would sit towards the back of the flat roof space and project forward from the glazed slope adjoining it by 0.8m. The visible height would be approximately 1.65m and the proposed extension would sit 600mm higher than the existing glazed slope.

As a result, the proposal would only be marginally visible at street level when viewed directly across the road and there would be limited views from the south due to the existing bulk formed by both side and front elevations at No.15. There are a mix of building heights along the Mews (between 2 and 2.5 storeys), including a neighbouring building (No.21) which has a pitched roof of similar height to the existing glazed roofslope at No.17. As such, the proposal would not be noticeably different in height within this context.

Overall, the proposal is considered to be a sympathetic and unobtrusive addition, in keeping with the light industrial aesthetic of the existing building and locality in terms of its design, form, size, position and materials. The use of pre-rusted Corten cladding panels would be consistent with the light industrial context of the Mews and the brown-red colour would not appear out-of-place with the predominantly red-brick host building and similarly coloured facing materials noted on other buildings within the Mews. As such, the proposal is considered to preserve and enhance the character and appearance of the building and Camden Square Conservation Area, and is acceptable.

The location and size of the proposed roof extension is such that it is not considered to cause any significant adverse impact on the amenity of neighbouring residential properties. Windows on the rear and front are sufficiently distant from any neighbouring properties and the opaque glazing system would ensure that any views towards neighbouring windows are restricted.

The site's planning and appeals history has been taken into account when coming to this decision. No objections have been received following statutory consultation.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the Camden Square Conservation Area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act [ERR] 2013.

As such, the proposal is in general accordance with policies A1, D1 and D2 of the Camden Local Plan 2017, the London Plan 2021 and the National Planning Policy Framework 2021.

- 2 Your proposals may be subject to control under the Building Regulations and/or the London Buildings Acts that cover aspects including fire and emergency escape, access and facilities for people with disabilities and sound insulation between dwellings. You are advised to consult the Council's Building Control Service, Camden Town Hall, Judd St, Kings Cross, London NW1 2QS (tel: 020-7974 6941).
- 3 This approval does not authorise the use of the public highway. Any requirement to use the public highway, such as for hoardings, temporary road closures and suspension of parking bays, will be subject to approval of relevant licence from the Council's Streetworks Authorisations & Compliance Team, 5 Pancras Square c/o Town Hall, Judd Street London WC1H 9JE (Tel. No 020 7974 4444). Licences and authorisations need to be sought in advance of proposed works. Where development is subject to a Construction Management Plan (through a requirement in a S106 agreement), no licence or authorisation will be granted until the Construction Management Plan is approved by the Council.
- 4 All works should be conducted in accordance with the Camden Minimum Requirements - a copy is available on the Council's website (search for 'Camden Minimum Requirements' at www.camden.gov.uk) or contact the Council's Noise and Licensing Enforcement Team, 5 Pancras Square c/o Town Hall, Judd Street London WC1H 9JE (Tel. No. 020 7974 4444)

Noise from demolition and construction works is subject to control under the Control of Pollution Act 1974. You must carry out any building works that can be heard at the boundary of the site only between 08.00 and 18.00 hours Monday to Friday and 08.00 to 13.00 on Saturday and not at all on Sundays and Public Holidays. You must secure the approval of the Council's Noise and Licensing Enforcement Team prior to undertaking such activities outside these hours.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraph 38 of the National Planning Policy Framework 2021.
