Subject: 2021/5844/P Liddell Road - cond 21 - Sustainability

Hi David

This application is for the condition worded as follows:

21 Impact piling

No impact piling shall take place until a piling method statement, prepared in consultation with Thames Water, has been submitted to and approved in writing by the local planning authority.

The statement shall detail the depth and type of piling to be undertaken and the methodology by which such piling will be carried out, including measures to prevent and minimise the potential for damage to subsurface water infrastructure, and the programme for the works).

Any piling must be undertaken in accordance with the terms of the approved piling method statement.

Reason: To safeguard the existing public sewer infrastructure and to protect the structural stability of the neighbouring structures, in accordance with policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy and policies DP24, DP26 and DP27 of the London Borough of Camden Local Development Framework Development Policies.

This condition is not in scope for Sustainability or LLFA consultation and we offer no comments.

Best wishes
Gabriel
