Dear Sir / Madam;

RE: Block D construction Ref no: 2021/3580/P

We would like to object to the construction of Block D and rearrangement of the street.

The new building will obstruct much of our natural light, giving our flat at the bottom of the block Falcon the least amount of sunlight. As this area is already quite dense, it will only intensify a claustrophobic feeling for many residents. This will also negatively impact our community garden which will receive very little sunlight as a result.

This block Falcon already has other issues such as constant lift breakdowns and mould, so as up to 62% reduction of daylight to our flats will only worsen our living conditions. Living here on the ground floor, we would be affected most, and we can say that nobody in the entire Falcon block would benefit at all from this.

We hope for your kind understanding of this matter
Thank you.

Respectfully yours,
