Subject: Re: Old fruit trees [E-CASE: wotOLb, E-TICKET: iIOtMD]

Importance: High

Hello,

These are the 3 trees on the boundary fence in the back garden at 68 Parliament hill.

On closer inspection They are a pear at the top an apple and a scraggy cherry which seems to be mostly dead, you can see the old pear is now compromised by the neighbours tree and together they create a lot of shade for the terrace of 68

I can supply other information if needed

I look forward to hearing from you

Hannah Mayall

Subject: Old fruit trees [E-CASE: wotOLb, E-TICKET: iIOtMD]

Hello I have taken on the job of gardener for a neglected garden at 68 Parliament hill NW3.

I have known this garden for at least 45 years when the existing pear and apple trees were productive and young. They are now old, unproductive and shaded out by their neighbours new fast growing Mimosa (i think) My client would love to be able to replant in a better place them with new productive fruit trees.

So I would like to obtain permission to remove all 3 and to start again.

Please advise as to the process for this

Yours
hannah mayall
