2021/5349/P		17/12/2021 20:09:28	OBJ	<p>Further to my previous objections, I object to the basement excavation. My reading of the Basement Impact Assessment - a complex and technical document - has made me very concerned. The new foundations of number 22 will be at a significantly different level from those of surrounding properties including mine (20) and I am concerned about the effects of this on the stability of my own house.</p> <p>Furthermore, Table 7.5.3 on page 43 of the Basement Impact Assessment shows that there will be damage to the front wall of my house. Obviously, as anybody would, I strongly object to any risk (with or without supposed mitigating recommendations) that my house will sustain damage during the proposed basement excavation. It seems very unfair that I should be put in this position.</p>
