

DEMOLITION SCOPE OF WORKS

- Denotes elements to be demolished
— Denotes elements to be retained

DEMOLITION & STRIP OUT NOTES

1. Existing timber light weight post elements with full height window module to be removed for replacement of proposed SPFS with fibre cement cladding panels.

Existing windows to remain - demolition works only refer to removal of existing glazing and replacing with infill opaque panel - please refer to demolition elevations drawings and drawings for proposed elevations.

* This drawing must be read in colour.

07 - Demolition Key

1:50

Following existing beam removal, new waterproof membrane to be installed and screed infill if required. Additional works on level 05 to prepare and tie the new steel bracket detail. Refer to SE design information.

Carefully remove the existing metal coping to be reused if possible. Prepare existing beams to receive new frame on top. Further information regarding watertight detail refer to drawing 21

Level 6 - Demolition Plan Planning

1:100

GENERAL NOTES

DAY Architectural Ltd accepts no responsibility for any costs, losses or claims whatsoever arising from these drawings, specifications and related documents unless there is full compliance with the Client or any unauthorised user of the following Architect / Designer.

- All boundaries, dimensions and levels are to be checked on site before construction and any discrepancies reported to the Architect / Designer.
- Partial Service: Any discrepancies with site or other information is to be advised to the Architect / Designer and direction and / or approval is to be sought before the implementation of the detail.
- Block and site plans are reproduced under license from the Ordnance Survey.
- Do not scale the drawing.
- For the purpose of coordination, all relevant parties must check this information prior to implementation and report any discrepancies to the Architect / Designer.
