2021/4224/P	D Soldi	31/12/2021 15:48:00	INT	<p>As the flat holder of the first floor flat in the property I would like to have conservation of the rear lateral chimney stack as this allows for a necessary flue in case of heating in the room beneath in the first floor flat, which has an original fireplace and chimney in situ.</p> <p>I note the additional staircase and also the potential for increased occupancy, so acoustic separation to good standard will be important to reduce sound impact in my flat below.</p> <p>Otherwise, being in a conservation area, roof tiles, velux and dormer windows will need to be of appropriate quality and appearance.</p>
