2021/5242/P	Michele Martin	02/01/2022 16:46:29	COMNOT	<p>Whilst we're not registering an objection to the proposed air source heat pump in this application, we are noting that anything installed needs not to disturb us in terms of noise or vibrations.</p> <p>We're saying this because of the particular nature and proximity of our house to 1 Villas on the Heath, which is next door. One of our external walls in fact makes up one wall of their internal courtyard where the heat pump would be. A large window of ours looks into this courtyard. This window is single-glazed and we can hear normal conversations when people sit outside. Because of the lay-out of our house, this window is also very close to our bedrooms. It would be good to carry on talking about this element of the changes. Thanks.</p>
