2021/6127/T	Gail Brown	03/01/2022 16:57:32	OBJ	<p>The 2001 Camden document outlying details of the Fitzjohns/Netherhall Conservation area explicitly singles out the importance of trees in the area and states: the private landscape often contains significant trees, whether groups or individual specimens contributing to the character of the area, visible from public areas or perhaps surrounding properties.</p> <p>There is no better example of trees contributing to our enjoyment and that of others in the area seeing this garden with this beautiful tree.</p> <p>I would urge the council to preserve the tree in this garden and reject this application</p>
