### 36. Pre-application Advice

Officer name:

Title	<input type="text" value="Mr"/>
First name	<input type="text" value="John"/>
Surname	<input type="text" value="Diver"/>
Reference	<input type="text" value="2019/3560/PRE"/>

Date (Must be pre-application submission)

Details of the pre-application advice received

Proposal: Demolition of rear building; erection of two storey roof extension to main station building and part three, part five storey replacement rear building. Use of extended building to include a mix of retail (A1); offices (B1a) and 8 self-contained residential flats (C3) including 4x 2bed and 4x 1bedroom units.

Conclusion Summary:  
The revised scheme is a significant improvement from the previous version, with a height and massing to extensions that would remain subordinate and not overwhelm the host building and a more appropriate split of uses within the building. However, the architectural approach / detailed design is not sufficiently refined given the locally listed status of the building and its importance in the local street scene.  
The scheme could not be supported in its current form as a result, though officers remain confident that a suitably refined architectural response can be developed with further work, particularly if further pre-app advice is sought.

Elements considered acceptable: Massing and height of the extension to the main station building; Massing and height of the extension to replacement rear building; Positioning of new uses across the site\*; Location and functionality of shared core; and Location of refuse and cycle store.

Elements considered unacceptable: Detailed design of roof extension to main station building; Detailed design of replacement rear building; Mix of unit sizes and Amenity standards of a number of residential units, Retention of fascia signage.

Suggestion for progression: Thorough feasibility testing of proposed massing to the amenity standards of neighbouring residents (e.g., natural light, outlook and privacy); Testing of amenity standards of new units proposed to ensure adequate amenity standards (e.g., natural light, outlook and privacy); Amend mix of units proposed to incorporate a range of sizes and to omit single aspect, north facing units; Revise external treatment and detailed design, informed by comprehensive contextual analysis; and Revise stores to provide separate residential and commercial provision, ensuring that they comply with the Council's minimum standards. Castle Place Alleyway –The way that the scheme addresses Castle Place in its design will also be of great importance to ensure that this space feels safe and comfortable for all users.

Camden Design Review Panel (DRP) should review any revised scheme in advance of a formal submission. For a development of this scale, a 'Chairs Review' would most like be appropriate. Early dialogue is also recommended with a number of key stakeholders:  
Immediate neighbours of the site, TfL (London Underground), and The Kentish Town Neighbourhood Forum.

Yes  No

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
