2021/3225/P	Nick Petford	14/01/2022 08:30:28	OBJ	The scheme as currently proposed is overbearing and visually debilitating. Amenity will be lost not just for local residents but visitors and all who have used Hampstead Heath (Parliament Hill in particular) as a place of escape and relaxation. Unobstructed views southwards are an endearing and persistent feature of the urban landscape and have been for decades. The new buildings will destroy this unique feature and degrade the enjoyment of many thousands daily who use this outdoor space. By all means redevelop, but limit the building height such that their visual impact is minimal and sympathetic to the current skyline.
2021/3225/P	Emily	13/01/2022 18:35:07	COMMNT	This would be absolutely horrendous overdevelopment. The height of these buildings is horrific and will change the views from Hampstead Heath forever. It is totally unacceptable that a few greedy developers should be allowed to ruin the area for everyone else. Nobody wants to live in these tall blocks. The council should switch focus to low rise development.
2021/3225/P	Annalisa Meloni	14/01/2022 07:24:50	OBJ	Having gone through the documents, as a local resident I would like to express my objections to these plans. Low- rise housing would fit better with the existing character and architecture and provide more suitable family accommodation.
2021/3225/P	Tara	13/01/2022 18:52:09	OBJ	Extremely concerned with the unsympathetic nature of this proposal clearly disregarding local surrounding environment considerations.  Little consideration for environmental impact and the drain on local resource. This is an unsustainable proposal and should be scaled down significantly and most certainly to reduce building heights to no higher than those in the surrounding area.
