2021/6108/P	patricia mcgrath	14/01/2022 10:01:07	OBJ	<p>we have regular anti social behaviour and drug use on the estate having benches will in-courage more of this, as for the gym and the play trail this will increases noise in the area it is bad enough as it is as we live in a noise trap, where the gym is going is where the kids play football they use that area as a goal post ! also the grass area becomes very water logged and very slippy during the winter and since lock down the park has also become very popular with dog walkers that don't pick up after there dogs, the last lot of people that did the walk around to see what should be done here did not even live on the estate so how do they know what we need we have said several times that we dont want extra play equipment just to improve what is already there.</p>
