2022/0004/T	Pierre Fouchet	18/01/2022 22:39:46	SUPPRT	<p>I fully support the proposed works. Public safety must be the priority. In light of the height of those trees, the decaying wound to T6 and the presence of Kretzschmaria Deusta in T7, it is clear that these works must be undertaken to ensure public safety.</p> <p>I should also note that these works will bring those private trees to a height that is more in line with the public trees on the other side of the road, which have been cut much shorter. This would be more sensible and more harmonious.</p>
2022/0004/T	B A Abraham for the Belsize Society	15/01/2022 15:29:50	OBJ	<p>For the Belsize Society: these mature lime trees are visually prominent in Netherhall Gardens and therefore have amenity value, and should be retained, broadly in their present state, if at all possible. No expert arboricultural report has been supplied concerning the condition of T6 and T7. If it proves necessary to fell T7, a replacement tree should be planted.</p>
