Subject: Gainsborough Gardens (application 2022/0181/T)

Hello,

I tried to use the web site but got the following error message twice when submitting - this happens regularly with the planning web site.

So can you please forward this to the relevant planning officer?

Regards

Pascal Dubois-Pèlerin

=====

I live nearby and enjoy walking around the gardens on my way to or from the heath.

I see no professional evidence of the need to fell the copper beech (T1), just a passing mention of fungi, which was not immediately visible when I inspected the base of the tree. If it has to be felled why replace it with an ash tree rather than a copper beech?

As to T6 I would object to felling it just to make it easier for tall vehicles, presumably mainly delivery vans. I would protect it properly with a metal plate (the one already in place could be used for that purpose) and move the kerb out to force traffic away from it.

Many thanks for confirming that you will consider this submission.
