| 2021/6074/P | Nigel Smith | 27/01/2022 23:02:12 | OBJ | <p>It should be apparent from my neighbours' comments and site plans that given the density, housing arrangement, topography of the site and the applicants' house location that it would be difficult to conceive of a more offensive over development likely to highly disruptive and damaging during installation and create a permanent blight to the Estate's aesthetic.</p> <p>Others have identified that the private space of number 34 to store builders waste is limited to a 240 cm depth driveway to a non integral garage (converted to a gym). At best it could only accommodate a 4ft skip only capable of holding limited waste . Any attempt to put a standard 6ft skip on the site which would occupy and obstruct a communally owned pedestrian pathway will be resisted.</p> <p>It appears they have obtained planning consent for the additional floor based on permitted development rights. It is unclear to me how they meet the required terms given the house has already been extended.</p> |
