**Subject: Dead Trees 68 Priory Road, London NW6 3RE**

Good Afternoon,

We have been advised that the three London Plane Trees in our front garden are dead. They died three years ago but we have waited to see if there is any leaf growth but this is the third summer without leaf. One of the trees has minimal leaf growth but they are all nasty and dead looking. The trunks are a little hollow sounding. We sadly think that there is little left we can do. Would you please review and consent to felling. We would like to plant new trees but would seek your advice on what would be best.

Kindly,

**vanessa kramer**
