

Product Description

BFT Garage Door/Gate Universal 4-Channel Remote Control Duplicator
433.92MHz.

Please check compatibility from the list below before purchase. Almost every remote control manufacturer is making remote controls in few different frequencies and different coding type. For example, fixed code or rolling code. Frequencies are 315MHz. 433.92MHz. and 433.92MHz. Make sure your original remote control is exactly the same brand and same model from our compatibility list. If it is not same, please don't buy. if unsure, please ask as first about compatibility.

Compatible with:

BFT TX1

BFT TX2

BFT VTM1

BFT VTM2

BFT VTM4

BFT GT01

BFT GT02

BFT GT04

BFT TEO1

BFT TEO2

BFT TEO3

BFT TEO4

Cloning process is only possible if you own one original remote control and it is in good working order. Don't confuse this model comes in few different frequencies and coding. Look to first picture.

Specifications

Item condition - New

Third party remote control. Not made by BFT

Decoder IC - Copy Code.

Frequency - 286-868.35MHz.

Operating voltage - 3V DC CR2032 (Free battery included)

Transmit distance - 25-50m in open space. Open space means no any interference. No walls, no doors, no trees or any other obstructions. Interference like garage door or brick wall can reduce remote control range significantly.

Rolling code cannot be cloned.
