

Fire Safety Statement

164 Haverstock Hill
London
NW3 2AT

The proposed structure is considered a 'minor development' and will not change or increase the risk of fire at the property, as this will separate from the main dwelling towards the bottom of the garden.

With regards to building regulations, our buildings are constructed with primarily non-combustible materials.

The proposed escape route will be clear at all times.

Access for emergency services will be not altered as a result of the proposed structure.

The fire escape routes for the main dwelling will still be through the property and will not be affected by this structure.

The structure is to be used as additional space to the main dwelling by the homeowner only.
