Subject: Application No: 2021/3225/P OBJECTION

Dear Camden Planning,

I would like to make an objection to the scale of the development at Murphy's Yard

Application No: 2021/3225/P

Historic England have recently objected on grounds of harming the iconic view from Parliament Hill - 'This panoramic view over central London is of considerable public importance, experienced by millions and one of the most beloved views of London, with huge public value. These impacts harm would run counter to policies in both the London Plan and the Camden Plan. Historic England encourages you address these concerns, with the aim of negotiating a scheme that avoids significant impacts on these strategic views.'

I am not against the development in general and recognise the need for affordable homes for local people, but I would favour something appropriate in scale and one that relates to the existing patchwork of 'villages' that have a distinct feel and make this diverse place such a great place to live in.

Many thanks,

Kelly Pawlyn
