

Subject: Objection to Murphy's Rard Development

Dear Camden Planning Department,

Objection to Planning Application 2021/3225/P, Murphy's Yard Development.

I do not object to development of the site but I do object to details within the proposal.

1. I object to the mass, density and height of the tower blocks. The environs of Hampstead Heath are important. The reality is that the openness of the Heath is impaired by the size, mass, density and height of the development's tower blocks.
2. I object to the lack of green public spaces within the development, which impacts greatly those who are in the area abutting the proposed development and those within the development.
3. Over 2,000 new residents without their own green space will inevitably converge on the heath and cause the kind of damage we saw during lockdown.
4. The size, scale, mass, density and height of these buildings does not sit in keeping with commitments to biodiversity and the ecosystem and that is markedly disappointing given the talk about it.

Thank you.
