Subject: Re development plan 2021/3225/P.

I reside in Savernake Rd and have done so for 40 years. When I first saw the plans for the Murphy's Yard development I was quietly encouraged - promises of affordable housing, a green corridor to the heath, scope for developing local businesses and associated apprenticeships etc. However the latest plans fall far short of this aspiration - in particular the high density and over tall buildings that are proposed will have a major detriment to the skyline / views from the heath, the apparent lack of guaranteed genuinely affordable housing and the so called green corridor which appears to be mainly asphalt! So unless the plans are radically revised I wish to register my strong opposition to them and would urge Camden to reject them in their current form.

Regards
Doug Crawford
