| 2021/5939/P            | Emma Willis             | 10/02/2022 16:50:40 | COMMNT          | I live right next to Utopia. My objections are about noise and the size of the units. There has been no real engagement with residents and the application was put in without our knowledge and just before Christmas. There are no signs up in our road. The size of the units are ridiculous and I don't understand how it can be anything other than noisy. Noise pollution is one the most pernicious things and can seriously affect and disturb residents. There is plenty of room within the building itself for these units. It feels like they have no real concern for our welfare and the effect it will have on all our lives. |
