Please note my objection to planning reference 2022/0419T and the proposed felling of the 2 plane trees. Their removal will adversely affect the amenity of the area and the well-being of its residents and visitors. I understand that they may be causing or threatening to cause damage, but this can usually be dealt with in other ways. In this case I understand it is possible to bridge over the roots and let the trees live.

Kind regards,

Michael Collard
