

5.0 Planning Context

5.5 Proposed Staircase

Proposed Staircase

The existing staircase, and in particular the the handrails are in poor condition. It is our intention to retain the existing stair structure and replace and / or strengthen the existing handrail and spindles with like for like products.

The intention for the new staircase to the loft is that it reads as a newer addition without being a completely new style. Therefore we propose to maintain a white painted tread and riser, and continue a timber handrail, set on fine steel spindles rather than timber.

Design intent for staircase
