Hello,

I am writing to you to assert my objection for the destruction of two mature London Plane trees in the garden of 8 Doughty Street.

These trees are important, part of the beauty of London, and they are necessary to the ecology and ecosystem. It is urgent to stop the destruction of trees, especially in cities where trees are more than important to our health.

Thank you for your understanding, I really hope to continue to see these magnificent trees in the garden of Doughty Street.

Best regards,

Ernestine Cruse-Philippe
