14 February 2022
Murphy's Yard Development
Camden Planning Application 2021/3225/P
Planning Department

We write as residents of Camden, who live close to the Heath and close to this proposed construction. Much of the rural aspect of the Heath stems from the absence of high buildings on the boundary. We particularly object to the mass and density of this development of 825 residential homes including six tower blocks of between 11-19 storeys. The tower blocks are a massive urban visual intrusion into the southern part of the Heath. These buildings are dreadful and a dismal precedent for future developments elsewhere. 100,000s of Londoners use the Heath regularly and it is vital to their health and well-being. The proposed development degrades the rural environment and is inimical to the enjoyment of Heath users. We object to this application which Camden should reject on its present scale. Thank you for your attention

Yours faithfully
Ferri & Farza Emami
