Dear planning Office

I am writing to ask Camden to KEEP the two trees at 8 Doughty Street
In the area they are important providers of natural habitat to millions of
insects birds etc There is so little point in felling a pair of majestic trees for no
real reason

Apart from being lovely to look at - they have been growing peacefully through
I imagine two world wars - so a bit unfair to fell them for no real reason

With best wishes

Lu Guthrie

(I am often in the area and visit friends in Doughty street quite often)
