2021/5946/P	Linda Bourn	18/02/2022 15:27:46	OBJ	<p>This is yet another tweak of the previous applications but we're still left with unwelcome alterations to the building and its skyline.</p> <p>At least they are now admitting that the proposal will cause harm but go on to claim that the harm they are causing would be outweighed by perceived public benefits.</p> <p>This company has a history of riding roughshod over the opinions of Haddo House residents. What they are doing by persistently submitting these applications constitutes harassment of the people who live there.</p> <p>Back in November 2020, residents were shocked to see someone abseiling past their windows. When asked what was happening, the reply was 'Cabling for 5G'.</p> <p>Camden, your residents are living in a constant state of threat thanks to this company.</p> <p>They are no friend of councils either. Remember when they issued you a not too veiled threat by pointing out examples of successful legal challenges brought against local councils?</p> <p>I understand that a number of residents are also concerned about possible health effects of masts. It is wrong to dismiss these out of hand. There may be no convincing evidence that mobile phone technologies cause adverse effects on human health. It is a logical fallacy to then assume this means that the technologies are safe.</p> <p>These residents don't want to become a tech company's guinea pigs. They have told you this in overwhelming numbers.</p> <p>I object to this proposal.</p>
2021/5946/P	Jacqui Jeans	19/02/2022 15:26:28	OBJ	<p>Once again I strongly object to this planning application to install phone masts on top of Haddo House NW5 1PX, on the same grounds, it will ruin the aesthetic look of the building and impact on the design of the building causing more clutter to the skyline. Why is this continually being attempted when clearly people do not wish this to go ahead?</p>
2021/5946/P	Julia Tomei	20/02/2022 15:49:52	OBJ	<p>This is the third time in two years that telecomms companies have attempted to put unwanted masts and other equipment on the roof of Haddo House. Each time the residents and wider community have made clear they do not want the masts and have rejected the proposal - citing concerns about the aesthetics, health and complete disregard for residents' wishes. It is unfair and unethical that these companies persist in the face of opposition. Please could you respect our wishes and desist from making these applications.</p>
