Dear Camden Council,

I would like to echo the letter in the current Camden New Journal concerning the fate of these two magnificent plane trees which are sound & doing no structural damage to the nearby buildings. I've lived in the area for approx 30 years & one of the things I enjoy the most are the varied trees & how beautifully they're cared for. Also, it is an accepted piece of fact how useful these trees are in reducing the toxins in the air from pollution & I'm at a loss to understand the lazy thinking behind the EES's application when the more likely explanation for cracks appearing in the plaster is a combination of old plaster & bumpy traffic.

Sorry for that. Please take into account how many residents, including myself, who're without gardens of their own, take great pleasure in the trees & small birds who build their nests in them as an integral & treasured part of urban life.

Yours sincerely,
Imogen Wallace (Lamb's Conduit St;)
