Notes:

The Survey has been computed on an arbitrary.

All Levels are in meters and relate to an arbitrary.

Station 1 Value 10.000m

All survey control must be checked and verified before any use.

All direction arrows indicate UP unless otherwise stated.

Drainage pipe sizes (where shown) have been gauged from the surface (for safety reasons) and should be regarded as approximate only. All dimensions and connections should be checked and verified prior to starting work.

Visible features in the vicinity of any boundaries, as shown on this survey, may not represent the extent of legally conveyed ownership.

Whilst every effort has been made to determine wall materials, no guarantee is given. Materials should be regarded as assumed unless verified by a qualified third party.

Internal walls measurements are taken to the wall finishes at approx. 1m above the floor level. The wall is assumed to be vertical.

If some of the features at the time of survey are obstructed or not visible, they may not have been surveyed.

Do not scale from this drawing.
