3.2 Brick Panel Samples

In this page different brick panel samples are shown. These have been made on site by the contractor and they aim to reflect the different brick cladding conditions in the building.

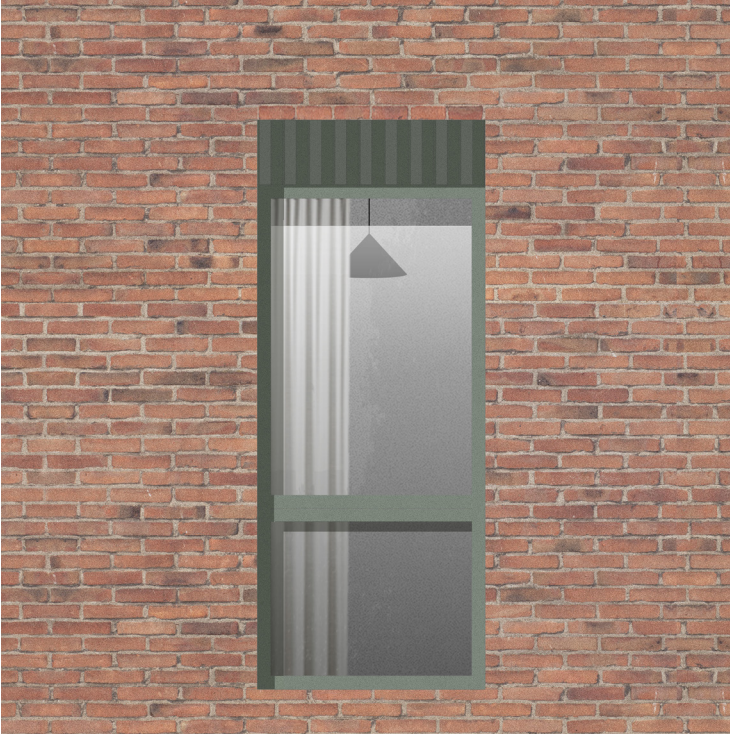

Type A - Chamfered window reveal with stepped brick detailing, header course lintel. Sage green metal window frame and spandrel panel.

Type C - Punctured window reveal with header course lintel. Sage green metal window frame and extended spandrel panel.

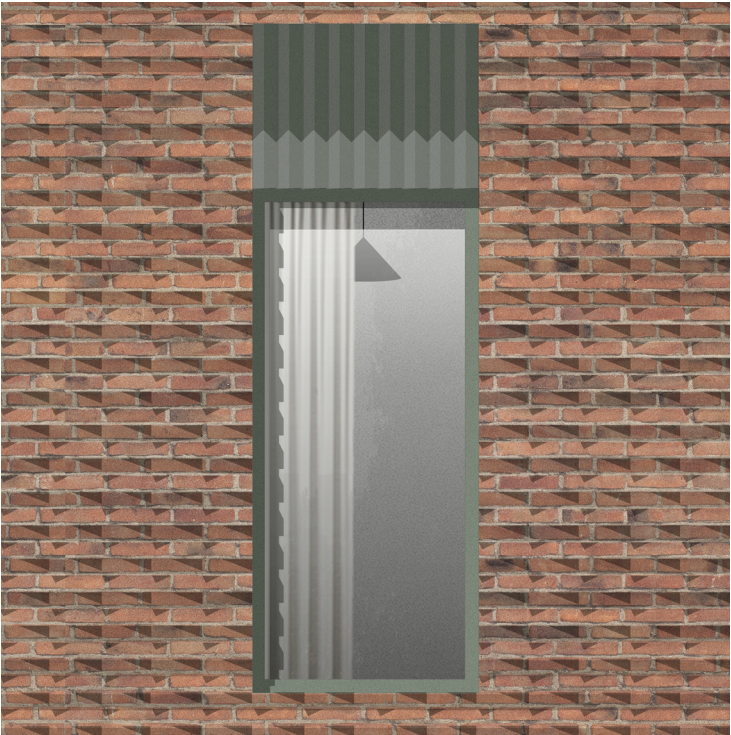

Type D - Punctured window reveal with stepped brick detailing. Sage green metal window frame and extended spandrel panel.
