2021/3603/P	Colin Melia	16/03/2022 16:20:45	OBJ	<p>Firstly, thank you for taking on board issues raised from the group meeting. Please take on board my feedback below:</p> <ol style="list-style-type: none"><li>1. Guarantee/Ensure that the window angle at first floor level and at Penthouse level is sufficient to address privacy issues discussed and raised. It does seem that the angle proposed is insufficient.</li><li>2. I object to the fact that the outdoor terraces at the penthouse level have significantly increased. One has actually doubled in size from the original plans.</li><li>3. I object to the building extension (left side Field Street elevation). Whilst design has been tweaked, I believe the only view of sky will be compromised. No diagrams showing impact of this elevation on Field Street were in the GIA report?</li></ol>
