2021/6259/P	Christiane Ten-Hoopen	19/03/2022 10:20:15	OBJ	This is a very nice corner building with a recessed curved brick panel, linking the two elevations, and a strong curved cornice. The presence of a mansard above, with a sharp 90 degree corner, would detract from the positive contribution that this building makes to the street and the Conservation Area. Essentially the curved corner makes it unsuitable for a mansard and it stands as one of the few remaining examples of the original form of the buildings of this period all along both streets which would not have been built with mansards. We therefore object to this application.
