Example of wall-mounted fan-coil units concealed with timber-panelled casings

Image of proposed internal fan-coil unit

Design Proposals

5.5 Internal Fan coil units

- Each floor will have 2-3no. fan-coil units mounted at low-level to replace the existing wall-mounted radiators
- The units will provide the heating for the office spaces as well as some comfort-colling during the summer months
- The chassis units will be concealed within timber casings such as the image opposite to blend in with existing timber work in the building
- The internal units are 620mm (h) x 1150mm (w) x 200mm (d)
