Subject: Planning Trees

Dear Planning Officer,

Re: application 2022 / 1187 / T

I live in Albert Street and my garden forms part of the green area between our street and Arlington Road. This area benefits from a few large fully grown listed trees, which enhance the area and promote wild life. None of the trees is close to houses and I feel it is unlikely they could be proven to be causing damage. Could it be an insurance company yet again trying to blame a tree for any shift in these old buildings?

Please do not allow this felling to go ahead. We need all the trees we have left in our borough, which has suffered so much from HS2 destruction.

Regards,
