Dear whom it may concern,

Writing to you regarding this application. These are listed trees and quite some distance from the buildings, Some pruning might be appropriate, but it is going to an incredible loss to many of our views as well as affecting the biodiversity and air quality of the area. Sycamore and Ash are not great trees, but they are what we have. I personally will be incredibly affected and am prepared to commission (with fellow neighbours) a report from an independent Arboriculturist to discover if their roots are really affecting the foundations of the main building.

Please note that this is a conservation area and that these trees are protected.

Regards

Fabio Traquinas
