Subject: Re: 2022/1187/T

Dear Sir,

As an Albert street resident, I strongly objected to the request of felling of listed trees above by Central and Cecil Housing Association insurer. We already have lost too many matured trees at Camden and losing the listed tress will affect the biodiversity and air quality of our Albert Street area. The trees are located quite a distance from their grade 2 listed building and should be preserved. All that is required is further pruning rather than felling the precious listed trees.

Regards.
