2022/0874/P	steven adams. MCAAC	05/04/2022 09:11:32	OBJ	We are firmly against this type of development and the Conservation Area Appraisal makes this point. Please refuse this application. The unwanted high level development would not only add to the bulk of the building but would also involve a loss of privacy to the neighbouring flats and houses.

There is also a degree of concern that this application, for a proposal in a CA, has been validated without a D&A statement.

2022/0874/P	Jonathan Byatt	06/04/2022 07:16:43	OBJ	Onjection. This structure would change the clean lines of a classic terrace style rear and begin to assemble a hodge podge of rear structures on an established design . Importantly, with no sound insulation, it would also prove a major irritant to neighbours as it used as a social focus for the residences - something neighbouring properties backing onto such rear gathering spots already siffer in summertime. .
