Details of the pre-application advice received

It was noted that the existing structure on the roof has been in existence for an excess of 10 years and that the use of the roof as a terrace would not constitute development.

It was explained that the purpose of the application was to enhance the existing building and replace the existing structures with a high-quality addition that would preserve and enhance the Conservation Area. The works are necessary now due to the current structures failing and causing water ingress to the flats below. It was noted that the applicant very much respects the heritage nature of the building and the streetscape of the area, this is a driving factor in bringing forward a high quality design.

There was a discussion about how the proposed addition would sit in the context of the frontage. KQ explained that the proposed structure is angled from the frontage meaning that it would not be discernible behind the parapet, this was shown via the side elevation drawing. It was agreed from the council's perspective that this resolved their concerns and the scheme would be supported by Camden Heritage. Please see the amended side elevation drawing which makes this clearer.

In terms of materiality the applicant team queried if there would be any preference from the council between zinc and aluminium, it was relayed that given the structure would not be viewable from the street that either material would be of high quality and be acceptable. In terms of colour, this was fairly open, utilising the local material palette namely the local slate could be an option. In order to avoid conditions, it was recommended that material samples be submitted alongside the application.

The green wall was discussed and no concerns were raised, suggesting that a product spec may be beneficial for the planning application stage.

In line with LBC's preference for renewable energy in place of non-renewable sources, that applicant intends to install an electric heating/cooling system. Other systems are not available due to restricted height of the room and the system is necessary to ensure the room is adequately temperature controlled. The CA Officer was satisfied with the location to the rear being tucked away as being acceptable, the case officer confirmed that they would seek advice from the sustainability team

Conclusions

The pre-application scheme was received well and would be supported by LBC Heritage.

The applicant can expect the advice in a few weeks however it was agreed that the council would be content to agree to a meeting note so that the applicant can advance their submission.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

- Yes
- No

Ownership Certificates and Agricultural Land Declaration
